More than seven years of turning paperwork, spreadsheets and scattered tools into fast, orderly web systems — from the data model to the interface, and from the first meeting to launch. Project management and technical supervision sit alongside the code, so planning a delivery is part of the work, not an afterthought. A specialization in data security still shapes the work: integrity first, access by permission, nothing left to chance.

7+	7	BSc	AR/EN
years building production systems	systems built for organizations	Computer Science · Data Security	Arabic and English

01 Selected *systems*

Seven systems built for organizations: scope, delivered work and stack

01 / 07

OpsIQ

ENTERPRISE · ERP

An integrated ERP — one system for an organization's daily operations.

SCOPE Project management · API · Web interface

- ✓ Delivery planning and management, from requirements to launch
- ✓ The ASP.NET Core REST API, designed and built
- ✓ The React web interface on top of it

C# · ASP.NET Core API · React · SQL Server

02 / 07

Ticket System

CENTRAL MANAGEMENT

A ticketing system that works as an organization's central desk.

SCOPE Project supervision · API

- ✓ Project supervision through to delivery
- ✓ The ASP.NET Core API behind every ticket
- ✓ The ticket lifecycle, modelled: open, assign, track, close

C# · ASP.NET Core API

03 / 07

Map Tracking App

MOBILE · LOCATION TRACKING

The backend behind a mobile app that tracks and shares location on a map.

SCOPE Project supervision · API

- ✓ Project supervision through to delivery
- ✓ The ASP.NET Core API that receives location updates and serves them back to the map

C# · ASP.NET Core API

04 / 07

Tech News Monitor

AI · AUTOMATION

An AI bot that gathers tech news from several sources and publishes it to Telegram.

SCOPE Project supervision · Backend

- ✓ Project supervision through to delivery
- ✓ The backend that connects the AI model to the Telegram channel

Python · AI · C# · Telegram Bot API

01 Selected *systems* CONTINUED

05 / 07

FieldTasks

FIELD OPERATIONS

Field task management, from the office to the ground.

SCOPE Project supervision · API

- ✓ Project supervision through to delivery
- ✓ The ASP.NET Core API and its service integrations

C# · ASP.NET Core API · REST APIs · Service Integration

06 / 07

Job Interview System

RECRUITMENT · SCIENTIFIC ENGINEER CLUB

Applications and interviews for the Scientific Engineer Club, in one place.

SCOPE Project supervision · API

- ✓ Project supervision through to delivery
- ✓ The ASP.NET Core API for applications and interviews

C# · ASP.NET Core API

07 / 07

Administrative Systems

CORRESPONDENCE · ARCHIVING · CUSTODY

Correspondence, archiving and custody records — off paper, into systems.

SCOPE Project supervision · API

- ✓ Project supervision through to delivery
- ✓ The shared ASP.NET Core API behind the three systems

C# · ASP.NET Core API

02 Skills, *layer* by layer

Arranged the way a request travels: interface, server, data

01 Interface
What people see and use.

React · Next.js · JavaScript (ES6+) · HTML5 & CSS3 · Responsive design

02 Server
Where the rules live.

C# · ASP.NET Core Web API · Node.js · Express · REST APIs · JWT

03 Data
What must never be wrong.

SQL Server · PostgreSQL · MySQL · Schema design · Query optimization

04 Automation
Work that runs by itself.

Python · Telegram Bot API · AI integration

Ways of working

Project management · Technical supervision · Remote & distributed teams · Technical documentation · Continuous learning

03 *Education*

BSc Computer Science

University of Technology

2014 – 2017 · Specialization: Data Security

04 *Languages*

Arabic	NATIVE
English	TECHNICAL

05 Working *principles*

Understand first

Every system starts from how the work is really done — not from a template.

Data you can trust

Integrity, permissions and security are designed in from day one.

Built to be extended

Clean, documented code that the next feature — or the next developer — can build on.

> *A good system starts with understanding how an organization actually works. The code comes after.*
